I am writing to voice my opinion on the MOU Draft you are working on that has to do with restricting pharmacies like Madison Pharmaceuticals, as far as out of state shipments.

I take the micronized capsules of natural progesterone. I do not know of any pharmacy in the state of Missouri that makes this form of natural progesterone. I would like for you to understand what this means to me & many other women like me. Before I found Madison Pharmacy & their form of the drug I take, I was a different person 2 full weeks of every month. That was half my life! Please do not discount my situation as isolated or one of "those women with a problem". My condition, symptoms & cure (or treatment) are all very real. My husband & family can attest to that fact. More often than not, they noticed my symptoms & subsequent relief of symptoms after medication ~~before~~ before I did.

PLEASE do not take away my best source for a drug I must take to be able to live a normal life. As I understand it, the phrase "inordinant amount" could limit the amount of drugs they can ship out of state. Please rethink your position & reconsider. You will be taking away a vital outlet for medical help for many women that would not be available otherwise.
